

Technical Data Sheet

Qualix-ANS

Qualix-ANS is an antistatic agent whose the main ingredient is polyhydric alcohol ester compound and gives excellent efficiency on polyester and its blends such as T/C.

Technical Information

Appearance:	Uniformity liquid
Chemical Composition:	polyhydric alcohol ester
Ionic nature:	Non-ionic
pH (10 % solution):	6.5+/- 1.0
Sp. Gr.	1.00 +/- 0.05
Solubility:	Easily in cold water
Compatibility:	Compatible with anionic, non ionic anionic and cationic material
Storage stability:	Min. 1 year under cool and dry conditions when stored in original sealed, packaging.
Application Fibers:	Suitable for Polyester fiber.
How to use:	Recommended use levels are 10-20 g/l according to kinds and density of fibers and an objective value

Feature:

1. Because Qualix-ANS has a good penetration effect on various fibers, it gives excellent antistatic effect
2. Because Qualix-ANS has good heat resistance, it doesn't cause yellowing or discoloration phenomenon.
3. Because Qualix-ANS has good compatibility with various resins, it can be used together with resin finishing agents
4. Because Qualix-ANS has a nonionic property, it can be used together with various auxiliaries
5. It is environmental-friendly product as APEO-free and NPEO-free.
