

Qualix-LBR **(Lubricating Agent)**

Properties

Appearance	:	Colorless liquid
Composition	:	High polymer compound
Ionic Nature	:	Weak anionic
Ph (10% solution)	:	7.0
Solubility	:	Miscible in water

Characteristic

1. Qualix-LBR solves the problem of crease which caused during dyeing and finishing process. Also, it can be obtained the rising fine-hair effect by using to Sand-Washing finishing process
2. When Qualix-LBR is use in dyeing and finishing process, it will decrease the quantity of the finishing agent by improving touch of dyed fabrics/thread
- 3 LBR solves the problem of crease of cotton knit specially 10s, 20s when dyeing and finishing done
- 4 LBR is non-forming type and it increases the operating efficiency of low bath ratio M/C by improving the circulation of the dyed fabrics

Application

It depends on the type of yarn/fabric and work out condition.
Generally use 0.5-1.0 % o.w.f

Packing

50 – 200 kg HDPE drum and as per customer requirement.
