

Technical Data Sheet

QUALIX - DFA

Qualix-DFA is defoamer with silicon backbones. These might be delivered as oil or a water based emulsion. The silicone compound consists of hydrophobic silica dispersed in silicone oil.

Chemical Properties

Appearance:	Milky white
Nature:	Non-ionic
Base:	silicon
Ph	Neutral
Solubility:	Water miscible in all proportions
Application:	0.2-0.5 %

- A defoamer or an anti-foaming agent is a chemical additive that reduces and hinders the formation of foam in industrial process liquids.
- The additive is used to prevent formation of foam or is added to break foam already formed.

Handling

We do not force any ill effect on health. Attention is paid to precautions and protective measures necessary when chemicals are handled.

This information is for guidance only.
