

Technical Data Sheet

QUALIX-MER

PENETRATING AGENT FOR MERCERIZING

Qualix-MER is a low foaming penetrating agent for mercerize. It gives an even mercerizing effect which gives good brightening and improves color value with even effect.

Technical Data

Appearance	:	Yellowish liquid
Nature	:	Anionic
PH (10% solution)	:	7.0 +/- 1.0
Sp. Gr. (at 25 C)	:	1.05 +/- 0.05
Storage Stability	:	Min. 1 year under cool and dry condition When stored in original packaging
Solubility	:	Easily miscible in warm & cold water
Compatibility	:	Compatible with anionic and nonionic material
Recommended Use	:	2–5 gpl according the bath

Feature

1. Qualix-MER is suitable for even a continuous process because of its low foaming property.
2. Qualix-MER provides uniform mercerizing effect, because it can penetrate into fiber-cells rapidly and uniformly.
3. Because of alkali resistance and low foaming property, Qualix- MER doesn't cause any troubles in a mercerizing process.
