

Technical Data Sheet

QUALIX-E-Tech

This is highly efficient wetting, penetrating and scouring agent with a very good shrinking and grain developing effect. It has multi-purpose uses for the removal of oil/soil stains, waxes, sizes, fatty matters etc from the grey fabrics during the different type of pre-treatment and preparatory processes. It increases the penetration of chemical to be used at different stages, thus making processes more effective. It has good compatibility with and can be used as rapid de-sizing agent because of excellent detergency and wetting effects.

SPECIFICATIONS:

Appearance	:	Milky, viscous, freely operable liquid
Chemical Nature	:	It is non-ionic produced based powerful solvents Glycolic Ethers and wetting agent
% non –volatile cont	:	32 +/- 1
Solubility	:	Soluble in cold water.
PH	:	Neutral to slightly acidic
Compatibility	:	Anionic – Good Cationic – Good Non-ionic – Good

APPLICATION

Qualix-E-TECH is particularly recommended in drum washing at 1.5 to 2.0 gpl to obtain good shrinking effects at 100-103°C for 60-90 minutes for obtaining and good feel and weight reduction in polyester fabrics. Use 2.0-4.0 W.P with less quantity (¼th of the usual) of caustic soda. Qualix-E-TECH in the scouring process with 3.0 of hydrogen peroxide with a stabilizer, caustic soda and soda ash with an anionic detergent at 100-105 °C for 30-90 min would produce good scouring result.
