

Technical Data Sheet

QUALIX-HY-Feel

(Polymer of alkyl ethylene for textile finishing)

Qualix-Hy-Feel is water soluble & most suitable for synthetic fabric, which is used to increase brightness and rubbing fastness. It is a low foaming product and has excellent resilience on fabric. Qualix-Hy-Feel is used for polyester, cotton-polyester blend, polyester-viscous fabric and good water absorbency.

Technical Literature

Appearance	:	Light bluing granules
Physical Foam	:	Powder
Component	:	Polymer of Alkyl Ethylene compound
pH of (1% solution)	:	7.0 +/- 1
Stability	:	3 years or more

Application

1. For 2400 meter fabric finishing take 0.5-1.0% of Qualix- HY-FEEL with 0.1-0.15% Amino silicone emulsion. OR
2. 100 ltrs water + 500 gm to 1000 gm Qualix-Hy-Feel + 100-150 gm Amino silicone emulsion

For permanent finishing of fabric, do above procedure at high temperature.
