

Technical Data Sheet

QUALIX-PU-Softener

Qualix-PU-Softener is water soluble & most suitable for synthetic fabric, which is used to increase brightness and rubbing fastness. It is a low foaming product and has excellent resilience on fabric. Qualix-PU-Softener is used for polyester, cotton-polyester blend, polyester-viscous fabric and has good water absorbency.

Technical Literature

Appearance	:	Light bluish liquid
Physical Foam	:	Liquid
Component	:	Polymer of Alkyl Ethylene Compound
pH of (1% solution)	:	7.0 +/- 1
Stability	:	3 years or more

Application

1. For 2400 meter fabric finishing take 0.5-1.0% of Qualix-PU-Softener with 0.1-0.15% Amino silicone emulsion. OR
2. 100 ltrs water + 500 gm to 1000 gm Qualix-PU-Softener + 100-150 gm Amino silicone emulsion

For permanent finishing of fabric, do above procedure at high temperature.
